GULF BRIDGE INTERNATIONAL

GBI owns and operates a multilayer carrier neutral network connecting the world to the heart of the Gulf.

Microsoft
Azure ExpressRoute®

Delivering the Cloud on your WAN

Migrating to the Cloud? Ensure an optimized end-user experience on a dedicated Cloud Connect platform with the best available connection to the Microsoft Azure server.

A GBI ExpressRoute service guarantees secure, direct, and consistently fast access to Azure applications and workload.

Scalable, secure, seamless

A secure connection to the Cloud designed specifically to meet your needs.

Fast, Private

Resilient, high-performing International MPLS backbone carries traffic privately as it bypasses public internet based alternatives.

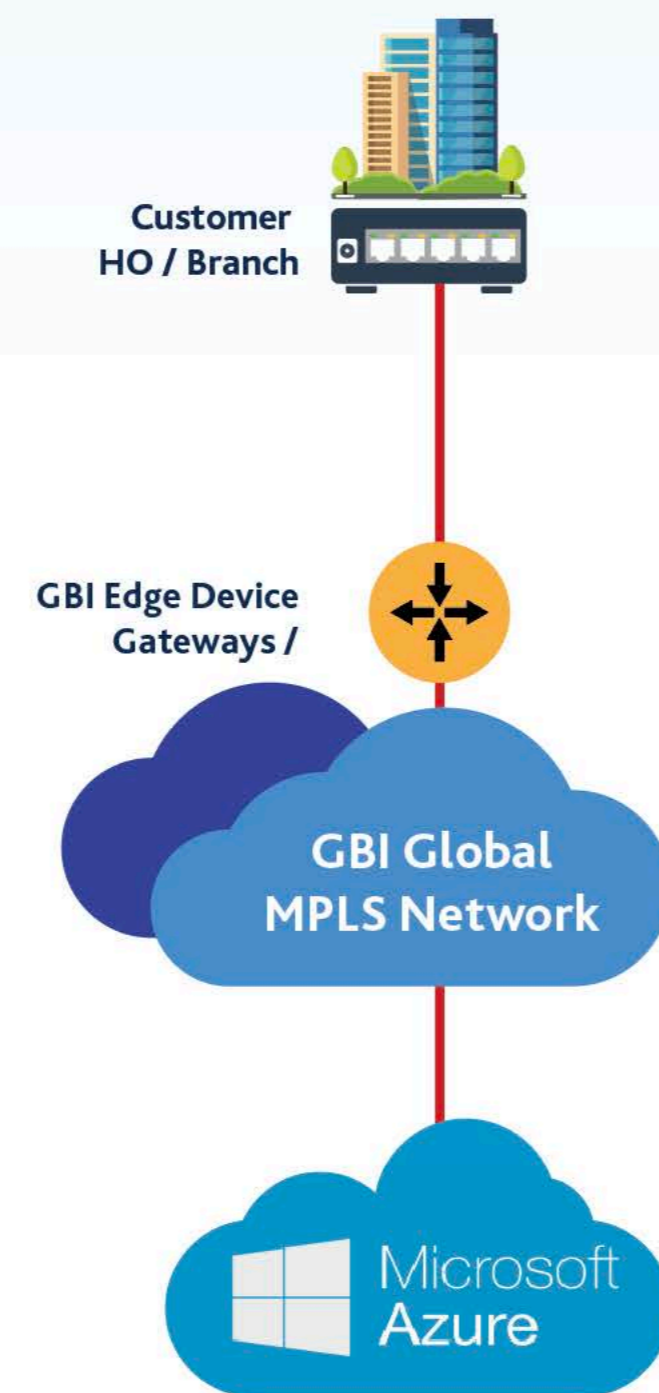

Create Hybrid Cloud solutions

ExpressRoute offers Enterprise the flexibility to build applications across their on-premises infrastructure and the Cloud

Peace of Mind

Connectivity to Azure is backed by strong SLAs for availability and Round Trip Delay.
