

Faster, Better

In the age of digital the speed and quality of the internet connection offered to your client is key. So, whether you are a Gulf based internet service or content provider, a carrier in the business of selling global VPNs or a regional cloud solutions provider then GBI can add value to your business through best of breed IP connectivity.

www.gbiinc.com

GBI Network

Robust

A full routing table, with connections to the largest IP Exchanges within Europe, in addition to regional Internet Exchanges in the GCC region.

Reliable

With multiple sub-sea cable and terrestrial routes and Tier 1 connections, GBI ensures traffic continuity, backed by our 99.99% SLA.

Fast

GBI's low average hop count demonstrates we are as fast or faster than any other Tier1 provider.

Flexible

Bandwidth flexibility from 100Mbps to multiple 10Gbps. Connectivity via multiple European, Asian and Gulf POPs including long haul options.

Class	Route
Premium	Advertising full global routing table incl. GCC leveraging GBI unique low latency route to Europe
Standard	Advertising full global routing table incl. GCC utilizing GBI standard south route.

About GBI

GBI owns and operates a multilayer carrier neutral network bridging the world to the Middle East.

Feature	Benefit
Coverage <ul style="list-style-type: none"> - Entire GCC covered with our IP transit service - 4 IP POPs in the Gulf, 3 IP POPs in Europe and 1 IP POP in Singapore providing GBI presence in the major IX regional/international hubs 	<ul style="list-style-type: none"> - Local strength backed by a global network - Choice of connectivity options bringing you closer to your customers - Offer your customers premium international connectivity without the need to invest in your own global infrastructure
Resilience <ul style="list-style-type: none"> - Protected terrestrial routes via the North Gulf - Unique low-latency protected North route via Iraq into Europe 	<ul style="list-style-type: none"> - Our resilient, scalable network allows you to rapidly respond to the market need for high quality internet. - Inherent diversity of the network minimizes your operational and capital outlay.
Service <ul style="list-style-type: none"> - 24/7 IP NOC - Flexible for IPT tuning and further enhancement 	<ul style="list-style-type: none"> - Receive relevant, timely information and access to round the clock control and flexibility you need to manage your service.
Speed <ul style="list-style-type: none"> - Equal or lower average hop count than other Tier 1s - Optimized routing across GBI owned and operated international network infrastructure 	<ul style="list-style-type: none"> - Receive lower latency for your time sensitive applications - Higher quality of service and reduced customer complaints
Flexible Pricing <ul style="list-style-type: none"> - Flat rate per Mbps per month - 95th percentile (data bursting) 	<ul style="list-style-type: none"> - Depending on your traffic profile you can optimize your pricing to reduce cost

Why GBI IP Transit?

GBI is the IP transit provider of choice with strategic aggregation of content from East and West. Locally our premium IP transit service leverages extensive regional peering relationships thus eliminating round-the-world routing from traditionally hard to reach countries in the region.

Classes of Service

GBI Provides	Premium	Standard
Guaranteed lower latency to Middle East and Far East locations as well as reach to Europe in less than 120ms.	Yes	
Full routing table including global and regional contents and major Internet Exchanges.	Yes	Yes

Technical Specifications and Latency

Access Speeds	100Mbps to 100Gbps
Interfaces	GE and 10Gig
Availability	99.99%

Destination	RTD (ms)*
Europe	90 to 140
India (Mumbai)	40 to 60
Asia	80 to 100
US East	200 to 220
Gulf	20 to 60

* Round trip delay for GBI's global AS 200612 as measured POP to POP

Pricing options

A range of pricing options are available that help tailor our solution to your particular need. You have a choice of a flat rate per Mbps per month where you'll pay a fixed amount for a pre-agreed amount of bandwidth. 95th percentile billing gives you flexibility in bandwidth where you receive a base bandwidth and an agreed burst level. Your contract with GBI shall detail these charges and any others including an installation fee.
